

The Gleichen Community

NINETEENTH YEAR, NO. 18

GLEICHEN, ALBERTA, WEDNESDAY, JULY 22, 1925

SUBSCRIPTION \$2.00 A YEAR

MINUTES OF BLACKFOOT M.D. MEETING

SEVENTH MEETING 1925

Minutes of the regular meeting of the Council of the Blackfoot M.D. No. 218, held in the G.W.V.A. Hall at Chancellors on Tuesday, July 14:

Present: Reeve Thorssen, Deputy-Reeve McBean and Councillors Rasmussen, Dunstan, Maynard and Daw. The minutes of the previous meeting were read and confirmed on motion of Coun. Maynard.

The secretary reported as follows: 1. That he had notified Mr. R. V. Potter that provisions had been made in the estimates to repair the road about which he had complained.

2. That the amount of relief furnished to Mr. McCallum was \$12.95.

3. That Mr. Edw. Christensen had paid one-half the legal costs incurred in drawing up the agreement he had previously entered into with the Municipality.

4. That the tile used in connection with the draining of the slough in the S.E. 19 and S.W. 20, all in 24-21-4, had been paid for as agreed.

5. That a tracing of a standard culvert was now on file in the Municipal Office and that a blue-print thereof had been furnished to each councillor.

The road commissioner reported regarding the road diversion at Stobart that the purchaser of that portion of the S.W. 28-22-23-4, lying north of the C.P.R. right-of-way, had agreed to give sufficient land along the northern boundary of this land a road diversion, to haul the material for and build the culvert required and to do the necessary grading at his own expense provided this Municipality would pay for the material used in this culvert and attend to and pay for the surveying of the land required for this road diversion, the preparation of the plans and the registration thereof.

Coun. Dunstan: That the report be adopted. Carried.

Coun. Maynard: That the accounts as o.k'd by the finance committee be paid. Carried.

The secretary reported that complaints had been received regarding the bad condition of certain portions of the roads on the north and west sides of 19-23-22-4 and north of 23-23-23-4, and that he had notified the councillors of the divisions in which these roads were situated. Each councillor affected stated that the matter was being looked into.

A letter from Bow Valley M.D. No. 219 was read in which it was stated that the council of that municipality was calling a meeting of representatives of several neighboring municipal districts to be held in Strathmore on August 6th next, at 1 p.m., to discuss the matter of weeds and bridges in the C. P. R. western irrigation block and requested this municipality to send a representative or representatives.

Coun. Dunstan: That we accept the invitation of Bow Valley M. D. No. 219 and that all the councillors who can be requested to attend. Carried.

The secretary drew the attention of the council to the fact that relief furnished to any resident of a municipality and not repaid by the end of the same year can only be entered on the tax roll as a charge against a parcel of land in which such resident has equity. He stated that on July 1924 hospital relief had been furnished to the wife of the purchaser under agreement of sale of the S. W. 23-24-21-4 and as the same had not been repaid during 1924 he had entered the amount on the roll as a charge against the land. The purchaser had lost possession of his land through cancellation of contract and his equity was nil the owner thereof was demanding that the charge be removed from the land. The matter had been taken up with the attorney-general whose advice was that under the circumstances the land could not be held.

Coun. Dunstan: That the amount of such relief be cancelled from the roll. Carried.

Coun. McBean: That the following pay-sheets be passed and ordered paid:

Division 1	\$1033.50
Division 2	\$330.00
Division 3	\$824.30
Division 4	\$614.50
Division 5	\$2.50
Division 6	\$637.25
Chancellor	\$75.00

The motion carried.

The matter of the building of this year's portion of the market road was then brought up by the reeve. The Council seemed to be of the opinion that this work should take precedence over municipal work and that the same should be done at once in order that it may be inspected and passed by the resident engineer after which we could get our grant from the government. The councillors of the divisions in which this road is to be built promised to start the work at once and have the same completed in time.

As the road commission had not had a holiday since he started to work for the municipality he requested that the council grant him a few days leave of absence.

Coun. Dunstan: That the road commissioner be given two weeks holidays. Carried.

Mr. P. Rogers, representative of the ratepayers association in division 1, addressed the council on the necessity for a set of public weighing scales in the hamlet of Chancellors and requested that the municipality install and pay for a set of scales. In being questioned he could not explain just how these scales should be operated. The matter was well discussed and the feeling of the council seemed very much against such an undertaking.

Coun. Dunstan: That this council give a grant of \$275.00 toward the erection of a public scale in Chancellors. The motion was declared lost on the following division: For the motion Councillor Dunstan; against the motion Reeve Thorssen, Deputy-Reeve McBean, Councillor Rasmussen, Councillor Maynard and Councillor Daw.

Miss Lynch of Boston is visiting Mrs. L. Michael.

Mr. and Mrs. John Kennedy and family left Monday for their farm near Hannah.

Miss Jean Gooderham is down from Calgary spending a vacation at her home in Gleichen.

The potato bug is becoming quite a nuisance in many parts of this district—pairs green is the remedy.

Miss Nettie Brown is down from a Calgary hospital, where she has been training for a nurse for the past two years, visiting her parents, Mr. and Mrs. R. W. Brown.

Two bad breaks in the town water main has caused considerable trouble the past week for our town fathers and water users, and incidentally has kept Henry and George out of mischief.

A small grub is doing some damage to wheat in this district, and so far there appears no remedy, but samples are being sent to obtain expert advice. The heads of the stocks become white and upon splitting the straw a very small grub is found inside.

W. C. Harrison has received word of the death of his step-mother's (formerly Mrs. Harrison) husband, Mr. R. T. Watts, in Collingwood, Ont. after a short illness. The hundreds of friends around Gleichen will join the CaM in extending most sincere sympathy to Mrs. Watts in her great bereavement. All will also regret to learn that she has been in a hospital for the past eleven months and is still quite ill and has lost in weight considerably.

LONDONER LAUDS 36-HORSE DRIVER

Capt. Bertram Mills, From England, Says Slim's Work Is Masterpiece

Captain Bertram Mills, of London, England, manager of the three week show put on annually at the Olympic in London, was a visitor to the Calgary Stampede, and he came for the express purpose of seeing the 36-horse team from Gleichen driven by "Slim" Moorehouse in action.

Regarding Capt. Mills' visit to see the team, the Winnipeg Free Press had the following to say in part:

"Judging by the way he followed rather miraculously performance of the team for blocks watching the turning it twice in the length of two city blocks, he found it as interesting as any circus turn he had seen. Asked as to what he thought of it, his first admiration was for the quality of the horses. There is not a horse that does not go under 1,600 and many would go over 1,800 pounds and all backs. He then characterized the driving of Slim Moorehouse as a masterpiece."

VIVID DRAMA COMES OUT OF THE SAHARA DESERT

GLEICHEN COM. HALL, JULY 25

A new, picturesque and vivid motion picture has come out of the Sahara Desert. A thrill and chime patrons of the silent drama.

It is Edwin Carewe's picturization of "A Son of the Sahara", which is to be produced at the Gleichen Community Hall next Saturday night—July 25th.

Made in the Algerian desert, there is nothing of the usual Hollywood Sahara about it. The magnificence of the true Sahara, with its giant sand dunes and its limitless horizon, unbroken except for the majesty of the Atlas Mountains, is there as the setting for strong drama.

The panorama of a great camel caravan, the clash of real Arab tribes men with real Senegalese troops of the French government, scenes in the palace of a great Sheik and the dancing girls, are features of this extraordinary screen offering.

And through it all runs a powerful story interpreted by an exceptional cast.

INVITATION TO IRRIGATION CONVENTION AT KELOWNA

The City of Kelowna extends a special invitation to the prairie people to visit them on the occasion of the Nineteenth Annual Convention of the Western Canada Irrigation Association, which is to be held at this city July 29, 30 and 31. The Queen City of the Okanagan is beautifully situated on the Okanagan Lake in the heart of the orchard country, and a visit at this time of year affords an opportunity of seeing this highly productive section of British Columbia at its best. In addition to the program of the Convention the people of Kelowna are making elaborate arrangements for the entertainment of the visitors. Automobile trips in the surrounding country are being arranged, and full privileges of the aquatic club with its wonderful boating, swimming and dancing will be granted to the visitors, while a civic dinner and dance in the open air on the lake side on the last night of the convention will be a fitting culmination to the convention.

The session will be open on the morning of July 29th, and will be continued on the 30th and 31st. The speakers at the opening ceremony include the Lieutenant Governor of British Columbia, the Hon. Walter C. Nichol and members of the Dominion and Provincial Governments, the mayor of Kelowna and guests.

MEADOWBROOK BASEBALL TOURNAMENT, JULY 31ST

On Friday afternoon, July 31st a baseball tournament between the Milo, Cluny Arrowood and Meadowbrook teams, will be played at the Meadowbrook Community Hall, when a big crowd is expected and assured of seeing some real good ball games.

The games start sharp at 1:30 that afternoon.

In the evening a dance will be given in the hall, for which a four-piece orchestra has been engaged.

The Meadowbrook people invite everyone to spend the afternoon and evening with them.

Chautauqua

Chautauqua got off to a fine start this season and is still creating the keenest interest.

The children's procession Friday evening was unique and enjoyed not only by the kiddies but by all who saw it, led by Helen McIntyre riding a pony. The tin band was quite disturbing and created plenty of fun. The prize winners were:

Iva Sanders, Aunt Polly.
Gladys Ferguson, Huck Finn.
Auly Robinson, Tom Sawyer.
Muriel Hamar and Betty Dingal, bride and groom.

Margret Cuthbert, bride's maid.
Margaret McIntyre, gipsy.
Alison Evans, circus girl.
Matilda Kennedy, rainbow.

Miss Bell, the superintendent, who had charge of the children, entertained at games, etc., for several days previously and gave them scrambles of nuts as well as supplied the prizes at her own personal cost. The Gleichen children will long remember Miss Bell.

The McDonald Kiddies opened the first entertainment Saturday night, every moment of which was enjoyed by the big audience that filled the big tent and taxed the seating capacity. The kiddies can always be counted on to attract a big crowd in Gleichen, but they certainly pleased everyone Saturday night with dancing, songs recitations and dialogues.

Miss McDonald, who accompanies the children everywhere, and is about as popular with Gleichen folks as with the "Kiddies", has the happy faculty of having the little ones love her and that she returns it was seen upon their arrival in Gleichen, when she mustered them into a restaurant and from there took them to their rooms in the hotel to rest until the performance.

Monday afternoon the play and Russian songs were well received and the lecture by Mrs. D. Pirie Beyca "The Four Cornerstones of Citizenship" was greatly appreciated.

That evening "The Mikado" pleased everyone and was much enjoyed. Yesterday afternoon the Howard Russell revue took well. That evening Dr. George Henry Bradford's lecture "This Way Up" was a genuine treat.

The entertainments for today as well as tomorrow and Friday are all equally as promising as those already presented.

ST. ANDREW'S CHURCH SERVICES

Sunday School 10:15
Morning prayer 11 a.m.
Evensong 7:30 p. m.
Rev. Neville Blunt, incumbent.

Sterling, M.P. The program also include addresses by irrigation authorities in Canada and from the United States. Bodies entitled to representation are now appointing their delegates, and already a good attendance is assured. A special committee is in charge of the arrangements for the accommodation of the visitors and to assure their comfort and entertainment during their stay in Kelowna.

WEEKLY CROP REPORT PRAIRIE PROVINCES

Winnipeg:—Weather during the past week has been mostly dry and very hot this being exceedingly hard on crops in localities where moisture reserve was small. Practically all wheat is headed out, and a considerable percentage of early fields are in milk or early dough stage. From present indications it would appear that cutting should be about general by the middle of August.

Red rust is in evidence in a few sections of Manitoba and Saskatchewan and there is also traces of black rust, other varieties being found principally on the leaves, though a little stem rust has also been reported.

A heavy crop of straw will create a big demand for harvest help.

Hail has taken further toll of crop in parts of Saskatchewan and Alberta.

There has been a considerable increase in cattle shipments over the previous week at local yards, most of which were of inferior grades.

Crop conditions through Manitoba are still satisfactory, and all prime grains appear to be doing well, but would benefit from further rain fall. Several reports of red rust and one or two of black rust on leaves, have been received, apparently this is a mild form, and while it may develop at present it is not causing much anxiety. Barley cutting on a limited scale has commenced in some districts. The fall rye crop is doing well, and is almost ready for the binder. First cuttings of sweet clover for hay have been almost completed, showing a heavy crop.

Saskatchewan:—The extreme heat of the past week has been very trying to crops, more especially in south western Saskatchewan, where a considerable change in the crop situation has taken place. The moisture re-

serve is almost exhausted, and in some sections the crop is already badly damaged. Unless there is more than average rain fall during next week or two, the yield will be low. Such conditions are found on the Empress, Burnstall and Maple Creek subdivisions and it has been estimated that prospective crop yields have depreciated from 25 to 35 per cent, from conditions indicated in June. Odd reports of rust have been received, but infection as yet, apparently only slight. Hail is again responsible for somewhat heavy damage in a number of localities in central and northwestern portions of the province.

Alberta:—The drought and extreme heat the past week, accompanied by warm winds, has considerably changed the crop outlook in Alberta, particularly in southern sections, where stubble and sections sown on spring plowing are burning up. Summer fallows, however, are apparently holding out fairly well. During the week end one or two hours rain fell between Brooks and Calgary, and heavy rains from Edmonton to Calgary, and on the north end of the Alderdaye sub-division were also reported. All other points on the Macleod, Aldersyde and Crow's Nest subdivisions are in need of rain. On the Crow's Nest subdivision, west of Macleod, crops are standing up well, and summer fallow, in these districts, will give fair returns.

Edmonton:—Dunvegan and British Columbia railway the week has been very trying in many parts of the north country. Rain is badly needed in Wemby, Grande Prairie, Clairmont, Sexsmith, Spirit River, Whiteclaw, Berwyn and Peace River districts and crops in these areas are reported to be burning badly. The balance of the localities have had rain, and moisture, and the crop situation is satisfactory.

British Columbia:—Since the last report weather has continued hot and

dry and good heavy rains would be of benefit in non-irrigated districts. All tree fruits are developing well and vegetable crops are promising. Logan berries and raspberries are now moving freely, and shipments of field tomatoes have commenced. Grain and hay crops are all good, and harvesting is general in many districts with threshing starting towards the end of this week.

Mr. and Mrs. Lockyear have arrived from Burlington to visit Mrs. Lockyear's parents, Mr. and Mrs. A. E. Jones.

WORLD HAPPENINGS
BRIEFLY TOLD

A rumor that Sir James Craig was to resign as premier of the north Irish Government is officially denied.

The Bank of England has bought \$405,000 in bar gold. It has also received £1,000,000 from Holland and £411,345 from South Africa.

There were 215 accidents reported on Canadian railways during the month of May, resulting in 37 deaths and 233 persons injured. No passengers were killed, but 27 were injured.

The Panama Canal netted about \$14,000,000 profit for the government during the fiscal year which ended June 30, the treasury department announces.

Three hundred thousand persons are homeless as a result of floods in east and west Galicia, according to a Prague dispatch to the London Daily News.

Lossing control of his aeroplane while flying over Curtis field, Mineola, N.Y., Leroy Disbrow, 23, of Richmond Hill, N.Y., fell 800 feet to earth and was fatally injured.

King George received Ignace Jan Paderewski, the Polish pianist, at Buckingham Palace recently and conferred upon him the order of Knight Grand Cross of the British Empire.

Border troubles between the Soviets and Poles brought a protest from the Russian minister, M. Volkoff, who complained that a Polish guard in Volhynia entered Soviet territory and burned a Soviet border post.

Sir Robert Whigmans, who was formerly in the Canadian army and had a fine record in Egypt at Athara and Khartoum, has been appointed a colonel of the Royal Warwickshire regiment.

Broadcast Eskimo Programme

McMillan Northern Expedition Will Attempt Something New

Radio messages from the Arctic region have been brought to civilization, but not yet the human voice. When the McMillan navy expedition's transmitting stations are set up, one within 11 degrees of the North Pole, it is the ambition of Eugene F. McDonald, Jr., chief of radio with the party, to give listeners in a native Eskimos' programme as well as the voice describe what the expedition is seeing and doing.

It was an undertaking in which there was not too much confidence, because it had never been done and only limited observations could be made last year when radio was first tried in the Arctic. From that experience, however, and since low wave length equipment has been highly developed for this expedition, the chance of voice transmitting was considerably increased.

Estimates For Defence

Appropriations of Twelve Millions Passes House of Commons

Estimates for the department of national defence, totalling \$12,000,000, passed the House of Commons in committee. The chief opposition came when the vote for cadet services was under discussion. The amount passed provides for the permanent force, \$4,800,000; the non-permanent active militia, \$1,610,000; for air services, \$1,880,850; Imperial war graves commission, \$475,000 and adjustment of war claims, \$425,000.

A vote of \$100,000 in the supplementary estimates for artillery services brought an amendment by Robert Forke, that the amount be reduced. The amendment was lost in division.

Seek To Reduce Losses

Livestock Loss Prevention Association Formed In Ohio

With the hope of saving some of the millions of dollars of loss sustained from injury to stock in transit, the farmers, feeders and shippers of livestock in Ohio have formed a Livestock Loss Prevention Association. At least 50 per cent. of such losses are preventable, according to officials of the new organization, and the responsibility is about evenly divided between producers and the railways. Bruising from rough handling, both in loading and in the cars, is noted as a serious item.

Paris Snubs Soviet

Paris society still is refusing to recognize Ambassador and Mme. Krassin of Soviet Russia. Mme. Krassin recently tried to give a tea, but none of the invited guests attended.

An attempt will be made to raise large numbers of zebras in Scotland and England. Twenty-three of the animals recently arrived in England.

W. N. U. 1585

Prince May Visit West This Fall

H.R.H. Accepts Invitation to Join Moose Hunt at Nipigon

That the Prince of Wales will again be a visitor to Canada in the fall, is hinted in a communication from one of his secretaries to Neil McDougall, of Nipigon, Ontario, sportsman's representative of the Canadian National Railways. It appears that Mr. McDougall sent an invitation to His Royal Highness to take part in a moose hunt, which takes place in the fall, and the reply states that the Prince of Wales would be delighted to join the hunt and that he would certainly call at Nipigon on his next visit to his ranch, which he hoped would be "next autumn." The letter concluded with a jocular remark that the Prince trusted Mr. McDougall would not endeavor to "marry him off." This has some reference to an old joke existing between them. Mr. McDougall became acquainted with the Prince of Wales about five years ago, when the heir to the throne received his first lessons in catching the speckled trout in the Nipigon River.

Rushed Cargoes To Avoid Custom Duties

Aeroplanes and Steamers Made Fast Trips From Paris to London

Cargoes of clocks, watches and silks were literally hurled into England last week. They came through the air and over the water. Aeroplanes after aeroplanes swooped to earth and steamers after steamers made port all bent on the same object—to land all dutiable commodities possible before the first day of July when the re-imposed McKenna duties took effect.

The customs house at the London airport at Croydon was the finishing point of the greatest air race Britain has ever staged. Every suitable aeroplane left Croydon for Paris in response to urgent wireless messages. Both freight and passenger machines were used in a desperate fight with time. All day they arrived with silk from France, and clocks and watches from Switzerland. One machine alone landed with a ton of gold watches. A special aeroplane stood by at Zurich while the factories worked overtime to complete the orders for watches.

Medical Supplies For Deep Sea Fishermen

Yacht Has Been Fitted Out For Trip To Labrador

Bound for Labrador a yacht of 55 tons, only 90 ft. long, named Strathcona II, reached Southampton from Queenstown, and later set sail for St. Johns, Newfoundland. She carries medical supplies and other necessities to deep-sea fishermen along 600 miles of the coast. Captain A. R. T. Kirby, her commander, who was wounded at Zeebrugge, stated that the yacht had been fitted out for Dr. W. T. Grenfell by the Royal National Mission to Deep-Sea Fishermen. Dr. Grenfell would join the yacht at St. Johns as medical chief of the expedition. It is planned to establish medical stations and to attend to the needs of the community and also to obtain information as to navigation in the creeks and to make a survey of the northwest river, where nobody has ever been. The party may be away two years.

Earl Haig In Canada

Ex-Soldiers From Many Parts of Empire Greet Field Marshal

At the biennial conference of the British Empire Service League held in Ottawa recently, an organization of ex-soldiers who fought in the Great War, delegates were present from a number of countries, namely, Great Britain, the Irish Free State, Northern Ireland, Australia, New Zealand, India, South Africa, Burma, Rhodesia, Malaya, and Newfoundland. The conference was presided over by Field Marshal Earl Haig, who was commander-in-chief of the British armies for the greater part of the war. The American Legion was represented at the conference by Commander Drain, head of the legion.

Bequeathes Heart to Birthplace

Camille Flammarion, celebrated astronomer, bequeathed his heart to the town of Montigny-Le-Roi, his birthplace. It was announced when the mayor of Montigny-Le-Roi read the will. The mayor states the heart will be placed in an urn in the city hall.

Armistice Ended

Slimkins and his young wife had just completed their first quarrel. "I wish I was dead," she sobbed. "I wish I was, too," he blurted out. "Then I don't wish I was," and the war continued.

Four quarts of peanuts taken to China 35 years ago by a missionary, are the "ancestors" of the present Chinese production, which now exceeds the American crop.

Historical Parade

Past and Present is Vividly Portrayed in Calgary Pageant

The past and the present in vivid contrast passed in review before thousands of spectators at Calgary's jubilee celebration of the first coming of the R.N.W.M.P. A parade and pageant taking two hours to pass a given point was the feature of main interest.

A float representing King Charles upon the throne, signing the charter for The Honorable The Company of Gentlemen Adventurers of England Trading into the Hudson's Bay, depicted the historical, as did the Indians. The uniformed mounted police were links between the ancient and modern. The crowds that thronged the streets, the modern business buildings and the automobiles were contrasting representatives of the present age.

The pageant has been preserved in motion picture form.

A feature of the parade was the 38-horse team of black Percherons, driven by "Slim" Moorehouse. They and the train they drew—ten tanks of wheat—caught every eye.

The Great War Veterans had a float with crosses and poppies bringing memories of the latest war, while the redskins, in full war paint, were reminders of ancient struggles in the early days of the country.

Asks Allies To Pay Debts

Great Britain Would Collect Sixty Million Pounds On Account

Sixty million pounds is the sum Great Britain has mentioned in her note to the Allies concerning her debts as the amount she would gladly receive from them as soon as possible.

It is the American claims on Europe which have induced her to raise the question at this time, says a dispatch from London. The British treasury is apprehensive that Washington may get ahead of this country in collecting money from their common debtors. Not that Great Britain questions in the least the right of the United States to get all she can from the European debtors or is concerning herself in the least with what terms Washington likes to give. In influential quarters here it is fully recognized that Great Britain, whatever arrangement she herself made with America, has no right to question the terms or bargain America thinks it wise to make with her debtors.

All Great Britain asks is that as soon as any of her Allies begin to negotiate with the United States they should proceed pari passu to discuss in London their debts to England. That is the reason why the British Government has now circulated her debtors to remind them what she thinks is due to herself.

Exhibition In New Zealand

Canada to be Well Represented in Big Fair to be Held this Fall

The Dominion of Canada will be well represented at the New Zealand and South Seas exhibition, which opens at Dunedin next November, and will run until April, 1926. Plans are now under way by the Canadian Government, the Canadian Manufacturers' Association and independent exhibitors throughout the Dominion, to make the Canadian section of the exhibition thoroughly representative of Canada.

The Canadian Manufacturers' Association has engaged 76 spaces for the display of manufactured products of the Dominion. A considerable number of business men from Canada will visit New Zealand during the course of the exhibition.

Canada has been allotted the largest section of the building with the best location on the grounds, and is participating in the exhibition at the direct invitation of the New Zealand Government.

A New Use For Bees

Bees as constables were used in a village in Prussia. When a free-for-all fight developed among the patrons, the landlord rushed out and brought back a beehive. After putting on a mask he released the bees. The insects did their work swiftly and thoroughly, and within a minute every one of the combatants had fled from the battlefield.

Why Not "Coolth?"

We have noticed for the first time the word "Coolth" used in a headline. It is curious how little this old word is used anywhere, and yet it is as expressive and short as "warmth."—Kingston Standard.

Insurance Agent—"My dear sir, have you made any provisions for those who come after you?"

Harupper—"Yes; I put the dog at the door and told the servant to say I'm out of town."

A pianist playing a brilliant number will touch as high as 1,000 keys in a minute with one hand.

Treaty With West Indies

May To Some Extent Decrease Cost Of Living

The conclusion of what is known as the British-American trade treaty, whereby Canada and the West Indies enter into a broad preferential arrangement, is hailed as an outstanding accomplishment, calculated to bring wider markets to Canada, and, to some extent, to decrease living costs in this country. The arrangement is considered to have an imperial aspect, as well, because, like all other countries, the West Indies have been suffering from a post-war depression. Had not this arrangement been concluded, their disposition would have been to look to the United States for reciprocal favors. Now this business is to be kept within the empire.

The treaty means big business for the Maritime ports, which have been suffering. Their most prosperous periods were the days when the West Indian trade was carried on by sailing vessels. For some years, owing to inadequate means of transportation, most of this traffic has gone through United States ports for transhipment. The improved character of the vessel called for by the contract, the greater frequency of sailings, and the extent of the preference, insures this business for Canadian ports. By means of preferences ranging from 50 to 75 per cent., the arrangement affords a wider market for all kinds of Canadian produce and practically all manufactures, while the island products, hardly any of which are duplicated here, will be saleable in Canada under a 50 per cent. preference.

Following American Fashion

King and Queen Are Wearing Horn Rimmed Glasses

Broad and conspicuous eyeglasses frames, long derided by Britons and Europeans as being characteristic American "affectation," have finally achieved royal approval in England. King George adopted them recently; Queen Mary watched the international tennis matches at Wimbledon through lenses held firm and comfortably by them recently. Thus the modern bows cease to be a subject for jest in the light little isle; yesterday the inspiration of mirth, today they are a British institution intimately associated with the constitution, and entitled to all the respect that potent though unwritten charter commands.

As England becomes accustomed to broad spectacle frames the merits of these admirable aids to the astigmatic will reveal themselves in their true worth. The broad, rounded bridge rests lightly on the nose without cutting the cuticle; the temples, properly shaped by a skilled optician, hold the front firmly in place without constricting the delicate blood vessels; the curved ends do not irritate the ears. If a man must use four eyes, this is the wear for him.

And lenses set in broad horn fronts are protected in a considerable measure from breakage. The fall that would doom glasses set in metal is survived by the lenses in horn or shell.—New York Sun.

Education and Ability

Education is Limited by the Material On Which It Has to Work

Education does not produce mind. But it is the mind on which education works—a truth which is often forgotten by those who have set up the little tin god of efficiency and utilitarian dexterity as the educational idea. No amount of education will stuff knowledge and ideas into a mind that is incapable of receiving them. Education works no miracles or feats of magic; it is strictly limited and conditioned by the material it has to work on.—Cape Argus.

Canadian Ambassador to U.S.

Lieut.-Col. L. C. Amery, secretary of state for the dominions, replying in the British House of Commons to a request for a statement with regard to the appointment of a Canadian ambassador to the United States, said he had seen press reports about the matter but that His Majesty's Government had not yet received any official communication from the Canadian Government on the subject.

World's Smallest Yacht

At the "Temple of the Brave" a memorial at Hedge End, England, to the memory of yachtsmen killed in the Great War, is to be found the smallest motor yacht in the world. It weighs three grains, and is not as long as a man's thumb.

Amazing, But True

It's a most amazing thing, but if you tell a man that there are 326,244,518,214,327,216 stars in the sky, he will accept it as a fact. But if you put up a notice saying: "We Paint," he has to go and dab it to see if it's true.

Award Scholarships

National Research Council Names the Successful Candidates

Announcement is made by the national research council of the names of successful candidates for scholarships for the academic year 1925-26. Three fellowships, having a value of \$1,200 each, are awarded to Miss H. D. Chataway, Manitoba University; A. B. McClay, Toronto University; and John Russell, McGill University. Nineteen studentships, valued at \$1,000 each, and 27 bursaries, with a valuation of \$750 each, are also granted to other university graduates.

These scholarships are awarded annually by the council to the most promising and best qualified graduates of universities or technical colleges who apply for them, with the object of increasing the supply of highly trained research workers in Canada. Approximately, three applications for each scholarship available, were made during the year.

The scientific qualifications and research experience of the applicant determines the grade of award, for which he is entitled to apply. Fellowships, for instance, are granted only to candidates who have proven that they possess the capacity to conduct independent research in some branch of science; while the holder of a studentship must have had at least one year of post-graduate research experience. Bursaries are awarded to the best qualified candidates who apply therefore, and may be awarded to promising students who have just graduated in some department of science from a university or technical college. A successful candidate for any of these awards is required to devote himself, for a period of at least nine months, wholly to the objects of his awards.

Studentships have been awarded to the following westerners: N. D. Clare, Manitoba University; W. M. Martin, Alberta University; J. O. Wilhelm, Saskatchewan University; and L. L. Bolton, C. G. McLachlan and C. Silvert, British Columbia University.

Bursaries have been awarded to the following: H. J. Fraser, P. A. Macdonald, W. F. Riddell, Manitoba; N. J. Atkinson, J. H. McLeod, Miss L. E. Paynter, W. Rowles, Saskatchewan; L. V. Boll, I. W. Jones, Alberta; R. J. Crozier, A. F. Gill, W. E. Graham, W. W. Simpson, British Columbia.

New Livestock Organization

Animal Husbandry Men of Western Canada Form Association

Animal husbandry men of western Canada have formed themselves into an organization affiliated with the Canadian Society of Technical Agriculturists. The society has been formed for the purpose of co-ordinating and checking up the experimental work that is being carried on. It is probable that a similar society will be formed in the east, and their work will be unified through the C.S.T.A. In the meantime a provisional executive will take charge of the organization, and the first annual meeting will be held in Winnipeg next Christmas at the same time as the western agronomists convene.

The organization will include the Dominion experimental farm superintendents on the prairies, the animal husbandry men of the three universities, the three livestock commissioners and one or two others who are doing a certain amount of investigation work, including C. M. Leamouth, superintendent of institutional farms for Saskatchewan, and G. H. Hutton, of the C.P.R. agricultural department. The provisional committee of the new organization includes: N. J. Tinliffe, representing Manitoba; W. H. Gibson, representing Saskatchewan; F. H. Reed, Lacombe, secretary; P. Sackville, University of Alberta, is chairman.

Water For London's Millions

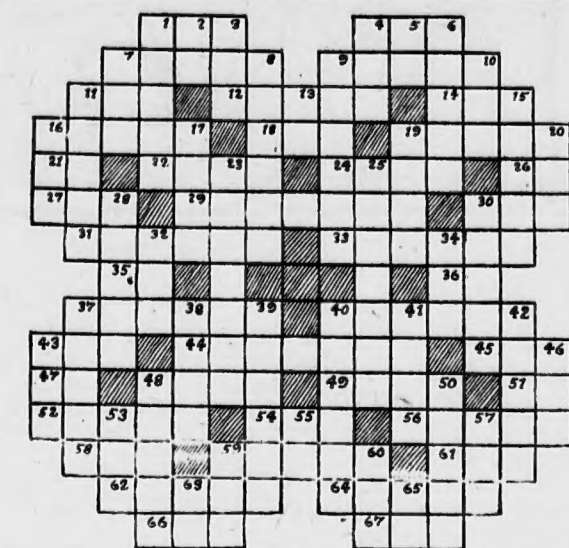

Reservoir of New Waterworks Plant Covers 723 Acres

One of the largest waterworks plants in the world is in course of construction sixteen miles from the great British metropolis. The reservoir itself covers 723 acres, and has a storage capacity of 30,133,928 tons, or 6,750,000,000 gallons, drawn from the Thames. Three meters with throats 5 feet wide pass in 100 million gallons of water daily from a great intake channel. Roller-slides 6 feet by 5 feet send the water into a draw-off tower, standing in the reservoir, whence, finally, it is sucked down the steel throats, 6 feet wide, of three pipes, and so over the embankment into the main, for the use of London's millions.

Delicate Compliment

Milliner.—To wear a stylish hat with grace you must have a head like this wooden model. That's the reason madam looks so charming in the one she is now trying on.

OUR CROSSWORD PUZZLE

Horizontal

- 1—Enemy.
- 4—The sun.
- 7—Dye.
- 9—Equipped with auricles.
- 11—Long, slender marine fish.
- 12—Torment.
- 14—Cleaning implement.
- 16—Bacilli.
- 18—Make a practice of.
- 19—Coin.
- 21—Prefix meaning in.
- 22—Clemmer.
- 24—Ostenatious.
- 26—Negative.
- 27—Prefix meaning three.
- 29—Children's gloves.
- 30—Hotel.
- 31—Penetrates.
- 33—Official authorized to attest deeds.
- 35—Perform.
- 36—Leave.
- 37—Fractious.
- 40—Splendors.
- 43—Beverage.
- 44—Covered with small curling waves.
- 45—But.

Vertical

- 1—Mercantile houses.
- 2—Preposition.
- 3—Source.
- 4—Salt.
- 5—Conjunction.
- 6—Fruit.
- 7—Sailor.
- 8—Bursts forth.
- 9—Number.
- 10—Put on.
- 11—Style of painting.
- 13—Exists.
- 15—Cent.
- 16—Obtain.
- 17—Indefinite quantity.

- 19—Fog.
- 20—At a distance within view.
- 23—Dirigible.
- 25—Different.
- 28—Large country of Asia.
- 30—Sarcasm.
- 32—Unit of weight.
- 34—Particular period of time in life.
- 37—Principal upright post of a stairway.
- 38—Canker of body.
- 39—Pointed weapons.
- 40—Registered for political appointment.
- 41—Prepare for publication.
- 42—Joined with a needle.
- 43—Pony of India.
- 46—Spread to dry.
- 48—One who chops.
- 50—Cover loosely with folds of cloth.
- 53—Annoy.
- 55—The same (abbr.).
- 57—Nooks or corners.
- 59—Circle.
- 60—Massage.
- 62—Three toed sloth.
- 65—Objective case of.

When North and South Meet

Prominent Irishmen Attend Dinner Given in London

Prominent men from both north and south Ireland attended a dinner recently at the Irish Club in London, the affair developing into one of cordiality and great harmony. Sir James Craig, the Ulster premier, was absent, owing to the death of his brother, and William T. Cosgrave, president of the Free State executive council, was unable to attend, but the guests included Timothy Healy, governor-general of the Free State, and the Duke of York.

The latter, eulogizing T. P. O'Connor, veteran Nationalist member of the British Parliament, raised a laugh by saying that the only complaint heard about him was that he was willing to do everything for Ireland except live there.

Governor Healy lauded the part King George had taken in the Irish settlement, saying:

"The turmoil and stress which used to prevail in South Ireland so wrung His Majesty's heart that but for him no approach to a truce or settlement would have been possible."

Manitoba Paper Mill

Big Plant to be Erected on the Winnipeg River

A 200-ton paper mill, which will cost \$1,500,000, and give employment to 500 men annually, and to 1,200 for seven months of the year, during the lumbering season, will be constructed at Fort Alexander, Man., by the Spanish River Pulp and Paper Company, in conjunction with the J. D. McArthur Interests, of Winnipeg, it is announced.

Fort Alexander is at the mouth of the Winnipeg River, a short distance from Victoria Beach, on the Canadian National Railways, Lake Winnipeg branch, and is about 75 miles north of Winnipeg. Construction work on the mill will start immediately.

Want Lord Byng To Remain

Lord Byng, it is said, would not consider a second appointment as governor-general unless in exceptional circumstances. But his high suitability for the post constitutes an exceptional circumstance.

Or, if someone were to tip off to the boys of the old brigade who fought under his leadership in Flanders what kind of exceptional circumstance he has in mind, willing hands will set about the task of improving it in good time.—Toronto Star.

Corner Stone Is Laid

The corner stone of the new Concordia College, a \$250,000 Lutheran educational institution at Edmonton, was laid on July 5. Pastor Frederick Brand, of St. Louis, Mo., conducted the service, and Rev. A. J. Mueller, Calgary, laid the corner stone.

Up In the Air

Declares Cities of the Future Will be Aerial

Cities of the future will be aerial, according to Frederick Kiesler, young Viennese architect, who is directing the Austrian section of the decorative arts exposition in Paris. Houses will be built on platforms, he says, supported by steel girders, several hundred feet above the ground and perhaps higher.

Distance, he added, is a factor which, owing to rapid transportation facilities and modern technical methods, no longer exists. We can live anywhere we like. Aerial platforms can be erected at any spot, above the beautiful gardens or shady forests, spanning rivers or rising from bottoms of lakes. The steel towers supporting the platforms, will contain rapid elevators, etc., carrying dwellers up and down between the houses and the ground, garden and roads.

Believes Tar Sands Available For Roads

Alberta Man Has Invented Machine For Extracting Oil

The use of Alberta tar sands for street paving will now be possible on a large scale as a result of a machine invented by Thos. Draper, president of the McMurray Asphaltum and Oil Limited, Waterways, Alta. The machine, according to Mr. Draper, has stood up to all that was expected of it in tests, made at Petrolia with tar sands brought from Waterways for the purpose.

The machine is built to serve the double purpose of being used for street paving and also for the extraction of the oils from the sands.

Architectural Effect

Old Farmer Gulletson, of Raspberry Acres, having sold the south 40, took his bride of 50 years before on a trip to Europe.

"Look, S'manthly!" he explained, as they gazed upon the leaning tower of Pisa, "the fella musta been drunk when he built that silo."—Life.

The sap rises in spring. In spring poetry he rises to heights of absurdity.

Railway Commission To Take Steps Towards Equalization Of Rates

Ottawa.—Definite steps towards revision and equalization of freight rates are being taken by the railway commission.

The board, in a memorandum, requests the public both as individuals and organizations as well as provincial, municipal and civil authorities, boards of trade, chambers of commerce, industrial organizations, firms, companies and individuals including shippers and carriers, to submit any statement of facts under which it is claimed that unjust discrimination or undue preference, or unfair treatment exists in connection with the rates of freight charged upon any commodities.

Information in respect to any unfair discrimination or treatment of any person, city or province by any railway company is also requested.

Statements setting forth the ground upon which it is claimed on behalf of the maritime provinces, that they are entitled to the restoration of the rate basis which they enjoyed prior to 1919 and submissions as to the encouragement of traffic through Canadian seaports are further asked by the board.

The memorandum recites the order-in-council under which the board is instructed to proceed with its enquiry into the equalization of railway rates, and declares that the board desires to enter upon its investigation with the least practicable delay and with a minimum of disturbance to business and traffic conditions generally.

Death Of General Strange

Distinguished Soldier Took Prominent Part In Northwest Rebellion

London. — Major-General Thos. Bland Strange, who was well known in Canada many years ago, died at Cambridge, Surrey. He was 94 years old.

General Strange was inspector of Canadian Artillery in 1871. He was commandant of the Fortress of Quebec for some time. He made a name as a daring and successful military officer during the Canadian Northwest Rebellion of 1885.

At the request of the Canadian Government, General Strange took command of the Alberta field force in the rebellion. It attacked and dispersed the Indians and half-breeds who were fighting under the leadership of the Cree Indian Chief Big Bear at Frenchman's Butte. He received the thanks of the Dominion Government for this.

Better Livestock Train Disbanded

Stock Was Sold To Farmers During Southern Trip

Regina.—The better livestock train, which has been travelling through the southern part of the province since June 10, has completed its itinerary and disbanded.

The train was organized by the department of agriculture in the Saskatchewan Government, with the co-operation of the Canadian Pacific Railway. The train was fully equipped for the exhibition of stock, the illustration of agricultural methods by means of moving pictures and lantern slides, and the giving of lectures on agricultural topics. In addition, a large percentage of the stock was sold to farmers in various districts during the course of the trip.

Qualities Needed By Nurses
Montreal.—Fact, sympathetic understanding, patience, gentleness, cheerfulness and discretion were the qualities of nurses, said Dr. E. M. Elberts, who delivered an address to graduating nurses of the city, but with all these virtues was needed a sense of humor. Without a sense of humor he did not think that either nurses or doctors could follow the path of duty year in and year out.

Largest Motorship Launched
Belfast.—A 22,000-ton motorship, the largest and most powerful of its type in the world, was launched at Queen Island, Belfast, and christened Astoria by the Duchess of Abercorn. The ship will trade with Argentine and Brazil.

It will accommodate 1,700 passengers.

Wheat Pool For Australia
Melbourne, Australia.—At the opening of the state of Victoria Parliament, the governor, the Earl of Strathbrooke, in the speech from the throne, foreshadowed a bill to establish a five years' voluntary wheat pool, with a guarantee of 75 per cent.

W. N. U. 1585

Tornado Hits Minneapolis

Three Persons Killed and Much Damage to Property

Minneapolis.—Three persons were killed and at least 25 injured here when a wind and rain storm, striking with the force of a tornado, swooped down on Minneapolis, tore the roof off a section of a pavilion at Lake Harriet and buried nearly a score under the debris.

As the wind rushed through the city, the floor in a south Minneapolis restaurant gave way beneath a half-dozen dinner guests, throwing them into the basement. None was seriously hurt, however. Store fronts were caved in by the wind, several houses damaged, trees uprooted, and traffic was tied up by flooded streets, as the sewers were unable to carry off the heavy rain. Basements of many houses were flooded.

Britain Reducing Dole

Hopes New Government Bill Will Be Aid to Emigration

London.—There is going to be a cut of six and a half million pounds in the unemployment dole under the new government bill and labor is furiously attacking the government. The minister of labor under this measure will retain his power of discretion to allow or disallow benefit already extended, by which it is hoped to check the scandalous abuses and the glaring cases of married women drawing the dole and yet being unwilling to work. The effect of the bill will be to reduce the number of men and women on the dole and to encourage emigration, which is today being seriously handicapped under the dole system.

Commander Maude Reaches Santa Barbara

Sailing to England From Victoria in Light Craft

Santa Barbara.—Commander Eustace B. Maude, British navy, retired, who set out from Victoria, B.C., two months ago, to sail alone to England in a 25-foot yawl, put into Santa Barbara harbor for provisions. He had not expected to land until he reached Panama, but was driven close to the coast recently by storms and decided to drop anchor here.

Victoria.—Commander Eustace B. Maude left here May 5 for England, in his 25-foot yawl. He is 74 years old.

New Game Law In Alaska

Non-Residents Must Be Accompanied By Licensed Guides

Seattle.—Beginning August 15, non-residents hunting game animals in Alaska must be accompanied by registered and licensed guides, the Alaska game commission has announced. Persons not licensed have been prohibited from guiding non-resident hunters.

Formerly, licensed guides were required only for the Kenai Peninsula, between Cook Inlet and Prince William Sound, south of Anchorage, but the new ruling covers all Alaska.

Hindenburg's Son Personal Adjutant
Berlin.—Major Oscar Hindenburg, who, until his father's election as president of the German Republic, was stationed with the Hanover Cavalry School, has been transferred to the defense ministry. He has been posted as the president's personal adjutant.

Suspend Death Sentence
Moscow.—A Moscow dispatch to the Havas Agency says the Soviet Government has granted the request of the German Government for a suspension of the death sentence on two German students charged with plotting to kill Leon Trotsky and other Soviet leaders.

Celebrates Birthday
Tarrytown, N.Y.—John D. Rockefeller was 86 years old July 8. His programme for celebration of the event included a round of golf on his private course, a family dinner with a big birthday cake and an organ recital.

Sign Arms Convention
Geneva.—A representative of the German Government has signed the convention to limit traffic in arms, formulated by the recent arms conference here. Germany had previously signed the protocol against the use of poison gas in warfare.

More Single Men Are Convicted Of Crime

Toronto.—Judge Dyson is authority for the statement that nine men are convicted of crime to every woman, and single men are three times as prominent on the list as married. At the annual convention of the chief constables of Canada, Judge Dyson pointed out that when the attention of the home was not given to the children, they experienced harmful freedom in their actions. They found access to the movies easy and from lurid films gathered ideas which poisoned their minds.

TRADE PACT IS NOW CONCLUDED WITH WEST INDIES

Ottawa.—Improved steamship services and mutual tariff preferences are the features of the Canada-British West Indies-Bermuda-British Guiana-British Honduras trade agreement, the full text of which was made public. The agreement, which is subject to the ratification of the Parliament of Canada, the colonial office and the governments of the other contracting parties, is for a period of 12 years, and will come into effect upon proclamation.

Canada, under the agreement, extends tariff preferences on bananas, cocoa beans, lime juice, limes, arrow root, coconuts, grape-fruit, rum, onions, cocoa butter, green coffee, ginger and spices, nutmeg, pineapple, sugar, marine sponges, angostura bitters. All goods other than tobacco, cigars, cigarettes and spirituous or alcoholic liquors, being produced or manufactured in any of the colonies mentioned, when imported to Canada, shall not, at any time, be subject to a tariff more than 50 per cent. of the duties imposed on similar goods under the general tariff of Canada.

Jamaica, The Bahamas, British Honduras, Barbados, Trinidad and British Guiana give Canada preference on flour, butter, cheese, lard, condensed milk, meats of all kinds, fish, apples and potatoes, boots, cement, prepared cocoa, confectionery, cordage.

Dog Gives Life For Mistress
Muskegon, Mich.—Krip, an old brindle bull dog owned by Miss Mabel Hill, gave his life to save his mistress. While walking near her cottage at Point Sheldon she came upon a rattlesnake coiled ready to strike. Krip attacked the reptile, killing it only after he was severely bitten. It was but a few minutes before the poison started its work, and within a hour the dog had died.

"Jack Miner and Tyrus R. Cobb Spend Vacations Together."

Jack Miner with some of his birds. Tyrus R. Cobb and Jack Miner in camp.

It is doubtful if, in Canada, there is a busier or better known man than Mr. Jack Miner, the Canadian naturalist, author and lecturer. In the United States the same is true of Mr. Tyrus R. Cobb, the world's greatest baseball player. Jack Miner is in his sixtieth year, while Ty. Cobb is in his fortieth.

For thirty-nine consecutive years, Jack Miner has taken a month's holiday each fall to get away from his public and busy life and has never seen the first of November at home. Always during that month, he has travelled each time by the Canadian Pacific Railway to Northern Ontario and has camped by the track all the way between Mattawa, Quebec and Port Arthur, Ontario. There he has walked over this territory by day, and partly by night. I say by night because during these thirty-nine years he has found thirteen lost men, all of whom had been lost over a day and a night.

For twenty-nine years Jack Miner carried a gun, and no individual had a more complete collection of moose and deer heads than did he. So great were they that when the Canadian Pacific Railway were planning their exhibit for the World's Exposition at San Francisco, California, in 1915, they purchased his trophies. Since 1915, Jack Miner has not carried a gun, but a pair of high power binoculars and usually a camera and, during late years, has been accompanied by his intimate friend, Dr. R. D. Sloane, of Leamington, who has won national fame as the official photographer on the Miner Sanctuary.

In the United States, it is doubtful if there is a better known man, outside of the president, than Mr. Tyrus R. Cobb, and he, like Jack Miner, has to get a rest away from the public life. He too strikes for the woods and during the last five falls he has been found camping with Jack Miner in Northern Ontario. They use new canvas tents each year and so their home is portable and is always pitched between two railway stations to ensure strict privacy and a quiet vacation. At once the Union Jack is hoisted close by the railway track so that the trainmen know where to throw off their mail and telegrams.

Besides Jack Miner and Ty. Cobb, the camp last fall consisted of Dr. R. D. Sloane, Eddie Bailey—a boy Jack Miner admires—and his own youngest son, Jasper Wilson Miner.—Douglas Gordon.

Mentioned For Railway Board

MR. JUSTICE W. F. A. TURGEON

In view of the impending equalization of freight rates by the railway commission, considerable influence is being exerted to have the vacancy in that board filled by a western man, and Mr. Justice W. F. A. Turgeon, of Regina, Saskatchewan, is being boomed for the position, the Ottawa Citizen says.

The Alberta Crop

90,000,000 Bushels Wheat Crop Is Seen In 1925

Edmonton.—In the neighborhood of 90 million bushels is the Provincial Government's wheat crop estimate now, in view of present weather conditions. It indicates a drop from previous estimates made in various quarters, the explanation being that dry weather, weeds, pests and reduction in acreage through farmers moving, have all combined to cut down the probable crop.

Hon. George Hoadley, minister of agriculture, now estimates the area seeded to wheat at 5,500,000 acres, and he puts the likely average yield at 17 bushels to the acre. This works out at 93,500,000 bushels, assuming that the present favorable conditions continue.

Italy Would Punish Speculators

Brand as Traitors Those Who Cause Financial Crisis

Rome.—Punishment of speculators as traitors to Italy was suggested by Deputy Schiavo of the Italian chamber, who asked Finance Minister Stefani what measures the government intended to take against those who caused the recent financial crisis in the country. He said those who bought foreign money needlessly, and thereby brought about depreciation of the lire, should be treated as traitors.

Provide Safeguards Against Bank Failures

Ottawa.—"The occurrences on which charges were launched under the Bank Act of 1913, against the former directors of the Home Bank of Canada, and upon which they were recently found not guilty by decision of the Ontario Court of Appeal, could not, in our opinion, take place under the safeguards provided in the new act of 1923, without early detection." It was stated at the department of finance in commenting on an interview given by Attorney-General Nickle of Ontario, in which he declared no further criminal prosecution would be conducted against the directors.

To Develop Empire Trade

Is Object of Self-Supporting League Says Viscount Jellicoe

London.—"The Self-Supporting Empire League" which has been on the stocks for six to eight months, had an enthusiastic launching at an inaugural luncheon, presided over by Viscount Jellicoe.

The objects of the league, Viscount Jellicoe explained, were to foster and develop the trade and industry of the empire, and to induce consumers to demand empire products, also to assist producers to meet the demands at reasonable prices at branches to be formed to encourage industries in their own immediate territories.

Among representative men from overseas, who gave the new movement their blessing, was Sir George Perley, former Canadian high commissioner in London, who said all loyal Canadians were ashamed that Canada had bought only ten shillings worth of commodities in Britain for over 41 spent by Britain in the Dominion.

"Let the league give the lead," he said, "and Canada will enthusiastically follow."

DISSOLUTION OF PARLIAMENT MAY TAKE PLACE SOON

Ottawa.—Decision whether a general election is to be held this fall will not be reached till cabinet resumes business after the holidays. But the more speculatively inclined are offering six to four in favor of dissolution. During the two or three weeks of respite, there will be a sounding out of constituencies and a general survey of the country. The heavy Liberal defeat in Nova Scotia for a time checked the talk of dissolution and should New Brunswick follow suit, it is quite conceivable that there would be further delay in appealing to the polls. None the less, all parties have been organizing for some time past. Prospects of a bountiful harvest, coupled with good prices, are further taken as favorable to dissolution.

Some ministerial changes are due and should the government decide for a general election, there will be a cabinet re-organization with an appeal to the country on a new slate.

A whole series of appointments remain to be filled. There are vacancies in the senate; there is a vacancy on the railway commission; the post of Canadian minister at Washington, for which an appropriation is made by parliament year by year has never been filled. The retirement of Hon. P. H. Roy as Canadian commissioner in Paris has likewise been mentioned from time to time, rumor associating Hon. Dr. Ireland, minister of soldiers' civil re-establishment with the appointment, should Mr. Roy decide to retire.

When it comes, the general election will be fought on the new distribution of seats. This will increase the membership of the House of Commons from 235 to 245. Nova Scotia will have two members less; British Columbia gets one member more; Manitoba two more; Saskatchewan five more; Alberta four more.

Trying To Sell Government House

Alberta So Far Has Not Received Any Offers

Edmonton.—What is to be done about selling or keeping Government House is to be the subject of a report to the next session of the legislature when it re-assembles on a date yet to be definitely fixed.

The government is now looking into the matter and Premier Greenfield, who was in the east when the invitation was issued to real estate dealers to make or get offers for the property, says this action is intended to carry out the wishes of the legislature by ascertaining what the chances are for a sale.

So far no offers have been received.

Critical Condition Of Anglo-Russian Relations Is Cause Of Concern

Pleads For Spirit Of Fellowship

Minnesota Governor Wants More Than Peace Between U. S. and Canada

Winnipeg.—Declaring that the hope of the world centres in the Anglo-Saxon experiment in self-government, and that the experiment in future will be mainly conducted on north American soil, Governor Theo. Christianson, of Minnesota, delivered a plea for continued Canadian-American friendship at the Manitoba Club. The governor and other members of a businessmen's delegation from Minnesota were the guests of the club at a banquet.

Referring to the fact that for 110 years there has been no hostile action between Canada and the United States, he said: "Let us pledge that henceforth it shall be more than peace, that, as in the past, boundaries have not separated us, so in the future a spirit of fellowship shall indeed unite us."

The Minnesota governor carefully traced the development of government on both sides of the border, declaring that Canada had guarded more closely than the United States the power of the legislative branch of the government against the encroachment of the executive.

Wants India As Partner

Britain Anxious to Have Co-operation Of Indian People

London.—Great Britain no longer "talks of holding the gorgeous east in fee, but asks India to march side by side with us in fruitful, harmonious partnership, which might create the greatest and proudest days of Indian history," declared the Earl of Birkenhead, secretary of state for India, in an important debate in the House of Lords.

Arguing that the 1919 act had not failed, but never had had a chance, because of the refusal of the Indians to co-operate with the British, Lord Birkenhead continued that the door of acceleration was open, but only when "we see everywhere among responsible leaders of Indian thought the evidence of sincere and genuine desire to co-operate with us in making the best of the existing constitution."

He appealed to the Indian people with deepest sincerity for goodwill and co-operation.

"We shall not be negligently bargainers if we meet the generous friendship which is near and dear to our hearts," said the secretary of India.

SUNDAY SCHOOL LESSON

JULY 19

THE GOSPEL IN LYSTRA

Golden Text: Blessed are they that have been persecuted for righteousness' sake: for theirs is the kingdom of heaven. Matthew 5:10.

Lesson: Acts 14:1-28.

Devotional Reading: Psalm 46:1-7.

The Text Explained and Illumined

1. A cripple made to walk, verses 8-10.—There being no synagogue at Lystra, Paul began his preaching in the open air. Near him was a man crippled from birth; probably like the cripple whom Peter restored, he sat begging in his accustomed place. Paul noticed the cripple's eager attention in his words, and believing that the man had faith to be made whole, he said to him, "Stand upright on thy feet." Another manuscript (the Codex Bezae) reads, "In the name of Jesus Christ I bid thee rise and walk." This was just what the man had never been able to do. Compare Christ's words to the man with the palsied arm: "Stretch forth thy hand"; the impossible happened—in both cases; the cripple leaped up and walked.

2. The people seek to worship Paul and Barnabas, verses 11-13.—Seeing the cripple walking, the people were so amazed that they cried out in the speech of their province (Lycania), "The gods are come down to us in the likeness of men." Egyptians and Greeks believed that the gods often assumed human bodies and visited the earth to reward the good and punish the evil. Homer, Vergil and Ovid record many such visits. Cowper translates a passage from Homer thus:—
For, in similitude of strangers, oft
The gods, who can with ease all shapes assume,
Repair to populous cities, where they mark
The outrageous, and the righteous deeds of men.

A special legend of the coming of Jupiter and Mercury to this very region (see the second topic) made it natural for the people to call one of the apostles Jupiter and the other Mercury.

The United States is the second gold-producing country in the world, the Transvaal being first and Canada third.

London.—Austen Chamberlain, British foreign minister, attempted to calm anxious members of the House of Commons regarding the critical condition of Anglo-Russian relations. He answered a bombardment of questions by stating the question of breaking off relations with Russia was not being proposed by the British Government, but he admitted the government was "closely watching the course of events."

Mr. Chamberlain also reiterated a previous assertion that the government must "retain liberty of action." S. Saklatvala, a Communist member, accused the government of a deliberate intention to sever relations with Russia after the house adjourned its present session. Mr. Chamberlain denied this vigorously, promising to give parliament a full opportunity of discussing Russian affairs at the proper time.

Mr. Chamberlain is expected to demand a show-down on the question of the Bolsheviks' continued anti-British propaganda in China in violation of the Anglo-Russian trade treaty of 1921.

Urges Preference Within Empire

Solution to Economic Problem Says Ontario's Premier

Paris.—As a result of his visit to England and his many interviews with leading men there, Premier G. S. Ferguson, of Ontario, reiterated his belief here that the solution of the economic problems of Canada and the empire depended upon a frank preference within the empire.

He advocated a spirit of co-operation in Canada in inter-provincial affairs.

The agreement between Sir Henry Thornton, president of the Canadian National Railways, and the Ontario Government, regarding the transportation of Alberta coal, he continued, was evidence of the getting-together movement towards a broader outlook, tending to strengthen the Dominion economically.

Alberta Senator Passes

Senator De Veber Dies at His Summer Residence in Aylmer

Ottawa.—For 27 years in public life and for 19 years in the senate, Hon. Senator Leverett George De Veber, M.P., died recently at his summer residence at Queen's Park, Aylmer, Que.

Senator De Veber was the son of Richard Sandys and Caroline De Veber, and was born at St. John, N.B., February 10, 1849, being in his 77th year. He is survived by his widow, formerly Miss Rachel Frances Ryan, and by one son.

Senator De Veber was a senator from Alberta and resided at Lethbridge.

Canada Prefers British Business

Britain Could Get More If Effort Were Made

London.—J. S. McKinnon, Canadian director of industrial exhibits at the British Empire Exhibition, speaking at a convention of British advertising men at Harrow Gate, Yorkshire, said that while Canada lived in the greatest harmony with the United States, the Canadian people would rather do business with Britain. Britain could get a deal of Canada's trade amounting to £102,000,000 which she now did with the United States if the effort were made. Mr. McKinnon said.

Trouble In China

British Government Consults Tokio and Washington Regarding Situation

London.—The British Government is in constant touch with Washington and Tokio regarding the Chinese situation, and the opinion is expressed in official circles here that the way will be cleared soon for a conference of the powers for adjustment of the Chinese customs. This, in turn, will offer an opportunity for the powers to co-operate with China in settling her house in order, officials here believe.

Union Jack Must Be Background

Vancouver.—No design for a new Canadian flag will have the support of the Native Sons of British Columbia unless it embodies the Union Jack as a background, according to a resolution adopted by the association at a meeting here.

The Success Road

To succeed you must have faith in yourself, in your ability and in your work; but without the partnership of money, this alone may profit you little.

With the assistance of money, Success comes easier. Lay the foundation of your prosperity with this Bank.

A Savings Bank Account, once begun, must be added to regularly if you are to attain the Success you desire.

Ask for our useful pocket Memo, Book—it shows how rapidly small savings grow.

TOWN AND DISTRICT

Miss Happy Jones spent the week end in Calgary.

Mr. and Mrs. Melvin Leveque, of Calgary visited Mr. and Mrs. Hugh Bates over the weekend.

Swimming in the backwaters of the Bow river continues popular among all classes—old and young.

Some farmers complain that small worms are eating into the new potatoes and doing considerable damage.

Fred Hamar, wife and family, of Rosemary, spent a few days visiting friends and relatives in and around Gleichen last week.

If in doubt ask yourself: "Is this an attempt to get something or to give something?" News gives; advertising seeks.

In future when Gleichenites go abroad they may introduce themselves as coming from the home of "The All Blacks—The World's Long-set Team".

Next week Gleichen can once more to the ordinary routine of life. With the potlatch, stampedes, chautauqua, etc., the past month has been somewhat strenuous.

Miss Wita Jones, who has been spending a short vacation with her parents, Mr. and Mrs. Elmo Jones left on Friday last to again take up her duties as teacher in the Hanna district.

A new law in the State of Michigan makes it necessary for village councils of that State to publish all the proceedings and votes of the council in the nearest newspaper with in ten days after the meeting of such council.

Although the trouble with the cut worm seems to be past the wise farmers are on the lookout to destroy as many as possible by destroying all weeds, etc., around their grain fields.

The Rev. A. D. Currie, of Strathmore, very kindly took the evening service, at St. Andrew's church, last Sunday, as the incumbent, Mr. Blunt was unable to return in time. The members of St. Andrew's feel indebted to Mr. Currie for coming down to help out on such short notice. Mr. Blunt will conduct all services next Sunday.

Calgary girls are anxious to know the names of the riders who accompanied "Slim" Moorehouse around that city with the "All Blacks". Of course, its just curiosity on the part of city fair ones and if the Call thought for a moment these girls want to know any of these good fellows we would never tell. Here they are girls: Billy McColeman, Ted Bartach, Walter Ward, Don Brier, Vic Arriison, S. McDonald, Sam Brown, Tom Kelly and Jack Moorehouse.

Gleichen is to have real old-timers re-union about August 1st and have already the promise of Mr. Harold W. Riley, secretary of the Southern Alberta Pioneers' and Old Timers Association, to be present and bring his wide-famed pictures of early days. Look for exact date and be prepared to be on hand. It will be worth your time.

GLEICHEN

TOWN OF GLEICHEN

Owing to the financial position in which the town finds itself all rate-payers who can do so are requested to make payment of their taxes as soon as possible in order that fixed charges, power, light and debentures may be met. Partial amounts will be accepted. Commencing 5th September all taxes then unpaid will require to be paid in one-fourth instalments not later than the fifth of each month. If this is not done collections will be enforced by distress.
